ABOUT ME

I hold nearly 10 years of academic and working experience within science and technology.

My work ethic and creative style has been continuously praised and respected by several professionals across different disciplines throughout the years.

I am immensely dedicated towards raising standards, and I am easily adaptable to new and familiar working environments.

HONOURS

Google - Developer Challenge Scholarship

Guarantors of Brain - University of Oxford Bursary

Launch.Ed - Business Ideas Competition (2nd)

CURRENT APPOINTMENTS

UCL Institue of Child Health. 2017 - 2018.
Research Software Engineer
Within Kirkham Lab, I developed 2 cloud-based software solutions for the research team as well as co-writing an article for peer-reviewed publication.

West London College. 2015 - 2018.
Lecturer in Inclusive Learning
As a lecturer in Special Education, I worked alongside several healthcare workers, specialists, governors, and parents to deliver effective education. I also managed a team of learning assistants and met termly goals/targets.

Centre for Clinical Brain Sciences. 2016 - 2017.
Research Intern/Student
I developed a novel pipeline which solves a critical problem in medical imaging analysis. With this experience, I also flew to Taiwan and collaborated with a team of experts and brought new data back to the lab.
